

Cancellation of the 6th International Research Conference of World Academy of Nursing Science

Over 700 abstracts were registered, and the number of participants was 1,090 for the 6th International Research Conference of WANS. However, the spread of COVID-19 reached a critical stage, and experts on infectious diseases and governments requested to refrain from holding meetings and gathering. Therefore, as a result of careful discussion by the planning committee, we decided to cancel the 6th conference of the WANS.

We sincerely apologize for the inconvenience caused by the decision. The program and abstract on our website will certify your attendance. Thank you very much for your understanding and cooperation.

Sincerely,

Noriko Katada, RN, DNSc
Chairperson of the 6th WANS
